Work history

Oct 2024 - Apr 2025

Dataspeak Analytica SDN. BHD.

Data Analyst Internship

- An internship at Dataspeak Analytica offers valuable experience in data analysis and decision-making.
- "Report Generator from Dashboard" captures dashboard layers and exports them to PDF, DOCX, or PPTX, for efficient reporting and presentation.
- Designed a mobile application and website for AI- Quran Tracking and Disposal.
- Refactored the project code from Java to Python as part of the PhD research by Dr. Azwa Aziz on the Contextually-Based Approach method for Sentiment Analysis.

Oct 2025- Current

Senai-Desaru Expressway Berhad

IT Support

Developed a full-stack analytics and dashboard system using FastAPI and Ionic Angular, delivering daily operational reports and executive reports for management to support data-driven decision-making.

Achievement

Final year Project

GOLD award in final year project showcase UniSZA.

Successfully developed an IoT-based fitness monitoring system for football athletes, integrating MQTT for real-time data transmission, Flutter for mobile application development, and Firebase for cloud data storage and analytics.
